

PB3130 L/R

Parking Barrier

Automatic Folding Arm (90 degree)

ZK Parking Barrier is a product which ZKTeco owns the independent intellectual property rights. The folding arm parking barrier be used to the underground parking area. The parking barrier support various ways to control. Such as by the remote control, access control system or UHF reader. Loop detector and infrared photocell as an optional function can promote the level of safety. If a loop detector is installed, impact can be avoided. The boom will be automatically lowered after the vehicle passes through the gate; otherwise, the boom can be lowered manually by using a remote controller or press button.

The parking barrier can be equipped with infrared photocell. When people / vehicle obscure the infrared launched from photo cell, boom will be stopped and then raised during lowering. After people / vehicle leave, the boom will be automatically lowered.

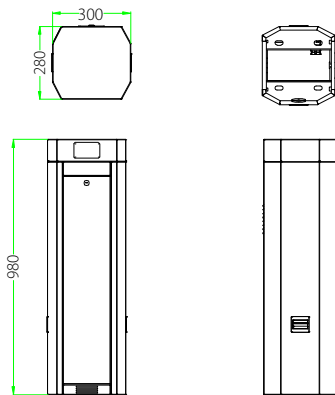

Features

- Folding arm is suitable for underground parking area;
- Compact design, convenient for packing and lowering delivery cost;
- ZK designed rolling pressure spring technology, extending product life;
- Boom can be raised and lowered smoothly and steadily;
- Convenient for maintenance and customization;
- Simple installation – just fix the barrier on floor and connect it to electricity.

Specifications

Lane Width	4M
Opening / Closing Time	3S
Supply Voltage	110V AC or 220V AC
Power Consumption Max.	200W
Frequency	50-60Hz
Cabinet Material	Powder Coated Steel
Boom Material	Aluminum Alloy
Base Frame	Cast Iron
Temperature Range	-20°C~+60°C
Humidity Range	≤90%
Ingress Protection	IP54
Packing Dimensions (Wx Dx H)	460 x 420 x 1150mm
Net Weight (Without Boom)	56KG
Gross Weight (Without Boom)	72KG

Dimension

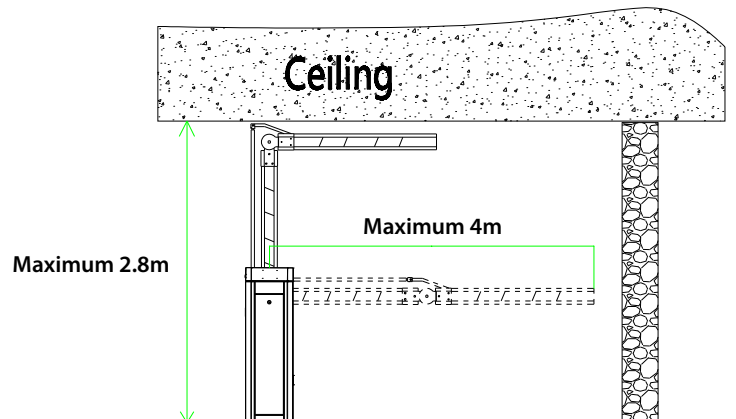

Accessories

Push Button station Siren Photo Cell
 Remote Transmitter Loop Loop detector

Optional Functions

Heater system Cooling system
 Wooden Package
 Controller(C3-100 or inBIO160)

Typical Installation
