

SBT1000S Series

SBT1000S Single Lane Swing Barrier Turnstile

SBT1011S Single Lane Swing Barrier Turnstile

(w/ controller and RFID reader)

SBT1022S Single Lane Swing Barrier Turnstile

(w/ controller and combination fingerprint & RFID reader)

Combined with mechanical, electronic, microprocessor control hardware and RFID technology. Considering availability of different dimensions, SBT1000S swing barrier is a useful solution to provide access control for people with special needs/ disabled.

The SBT1000S is a single lane swing barrier turnstile series designed for smooth and silent operation and low power demand. It's made of stainless steel which makes SBT1000S highly durable.

SBT1000S tempered-glass barriers are normally held in a locked position that deny access to the secured side. After SBT1000S's reader (RFID /fingerprint) recognized user's valid access card or fingerprint, its barriers will swing automatically, that allow the users pass to the secured side.

During emergencies, the barriers will swing automatically that ensure user can quickly access to EXIT. If power outages, the barriers will unlocked automatically that user can push the barriers to go through the lane.
